JF18041-165x30

profile	code	reinforcement dimensions [mm]	side [mm]	maximum horizontal span [mm]	maximum vertical span [mm]
				aluminum	aluminum
JF18041	JF18041	40 x 20 x 2	180	1700	1800
			41	1600	
		30 x 30 x 2	180	1900	2100
			41	1800	
	JF18041-165x30	165 x 30 x 2	180	3000	3000
			41	2300	

Maximum spans calculated considering:

- maximum permanent deformation due to own weight 2,5 mm
- maximum non-permanent deformation 30 mm considering a standard wind load of 150 kg/m²
- aluminum reinforcement standard thickness 2 mm, with greater thicknesses it is possible to reach greater spans
