

JF305101-61

profile	code	reinforcement dimensions [mm]	side [mm]	maximum horizontal span [mm]	maximum vertical span [mm]
				aluminum	aluminum
JF305101-61	JF305101-61	120 x 60 x 2	305	3600	3600
			101	3500	

Maximum spans calculated considering:

- maximum permanent deformation due to own weight 2,5 mm
- maximum non-permanent deformation 30 mm considering a standard wind load of 150 kg/m²
- aluminum reinforcement standard thickness 2 mm, with greater thicknesses it is possible to reach greater spans
