

About Us.

Our expertise and Italian manufacturing meet the greatest firms in international architecture.

We believe in the architectural tradition of our Country, where style and creativity come together in increasingly surprising explorations.

Provider

CEILING SOFFIT CLADDING DECKING SUNSCREENS

We transform wood fibers and plastic polymers, with low energy consumption, into a low maintenance material that can hardly be distinguished from wood for its beauty, the veining in the blend, the warmth that it expresses, combining technical performances, sustainability and durability over time.

WE heart: and therefore **WE are:**

- Nature
- Safety
- Architecture
- Our future
- The mark of responsible forestry
FSC® C196729
FSC® products available upon request
- Fire resistant
- Leed certified
- Sustainable

WoodN Greenwood creates projects with its innovative materials to clothe the ideas of the world of architecture and design with sartorial elegance, while respecting ethics and the environment.
