

# UNDERSTANDING ARCHITECTURAL COMPOSITE WOOD Features, Applications, Benefits

**WOODN GREENWOOD** AIA provider Number 40822049

Course Code: 04

Course Credit: 1 LU | HSW AIA CES

Course Name: Understanding architectural composite wood. Features, applications, benefits

## COURSE DESCRIPTION

This course is intended to meet learning objectives through the narration of wood composite material's features as well as presenting unique case studies, from design concept to completion, allowing the attendee to envision different applications for architectural composite wood.

## LEARNING OBJECTIVES

1. Understanding architectural composite wood from manufacturing, to an aesthetic, safe and durable installation.
2. Understanding benefits of using architectural composite wood vs traditional building products
3. Understanding the relevance of selecting and specifying an architectural composite wood based upon functional, safety, durability and sustainability considerations
4. Acknowledge features, relevance and benefits of architectural composite wood through the lens of actual case studies across US and Europe

Credit(s) earned on completion of this course will be reported to AIA CES for AIA members. Certificates of completion for both AIA members and non-aia members are available upon request. Please contact [education@woodn.com](mailto:education@woodn.com). This course is registered with AIA CES for continuing professional education. As such, it does not include content that may be deemed or construed to be an approval or endorsement by the AIA of any material of construction or any method or manner of handling, using, distributing or dealing in any material or product. Questions related to specific materials, methods and services will be addressed at the conclusion of this presentation. This presentation is protected by US and international Copyright laws. Reproduction, distribution, display and use of the presentation without written permission of the speaker is prohibited.
